

Trillium Health Partners declares outbreak of COVID-19 on unit at Credit Valley Hospital

March 31, 2020 – Four patients on an inpatient unit (1D) at the Credit Valley Hospital have confirmed positive for COVID-19 and an outbreak has been declared. Working closely with Peel Public Health THP has taken immediate precautions to protect patients and staff.

Under the guidance of THP Infection Prevention and Control, the unit was placed on appropriate precautionary measures, and all steps have been taken to quickly manage and identify any individuals with potential exposure to the virus. The four patients identified as having positive COVID-19 tests are being safely relocated to a unit exclusively caring for patients with COVID-19. All other patients on the unit are being actively monitored for symptoms associated with COVID-19.

Our top priority is the safety of patients, our health care workers and the community. As we continue to see community spread of COVID-19, THP remains vigilant and is actively preparing measures to respond to additional cases and outbreaks.
