

DO I NEED A MASK?

At Sunnybrook, our day-to-day infection control practices help keep us safe and prevent outbreaks and the spread of infection. Washing your hands is one of the effective methods of keeping yourself healthy. There are times when other precautions need to be taken.

Most roles at Sunnybrook do not require a mask. You do not have to wear a mask if you are not directly involved in patient care.

WHEN TO WEAR A MASK

Direct contact with all patients who have respiratory symptoms, whether or not they have recently traveled outside of Canada

- Surgical mask and eye protection
- Gown
- Gloves

WHEN DO I NEED AN N95 RESPIRATOR?

An N95 respirator should only be used when performing an aerosol generating medical procedure, such as an intubation or CPR.

You do not need a mask for lower risk interactions, such as patient reception or ambulatory education.
