

# CUSTOM GOVERNANCE LEARNING

**Governance is neither a tick-the-box exercise nor a one-size-fits-all formula. The practice of governance is dynamic, as is the environment in which Ontario hospitals operate.**

Is your board as effective as it can be in its governance mandate?

Are your board directors engaged and up-to-speed on the issues specific to a complex sectoral environment?

Are each of your directors fully contributing and accountable?

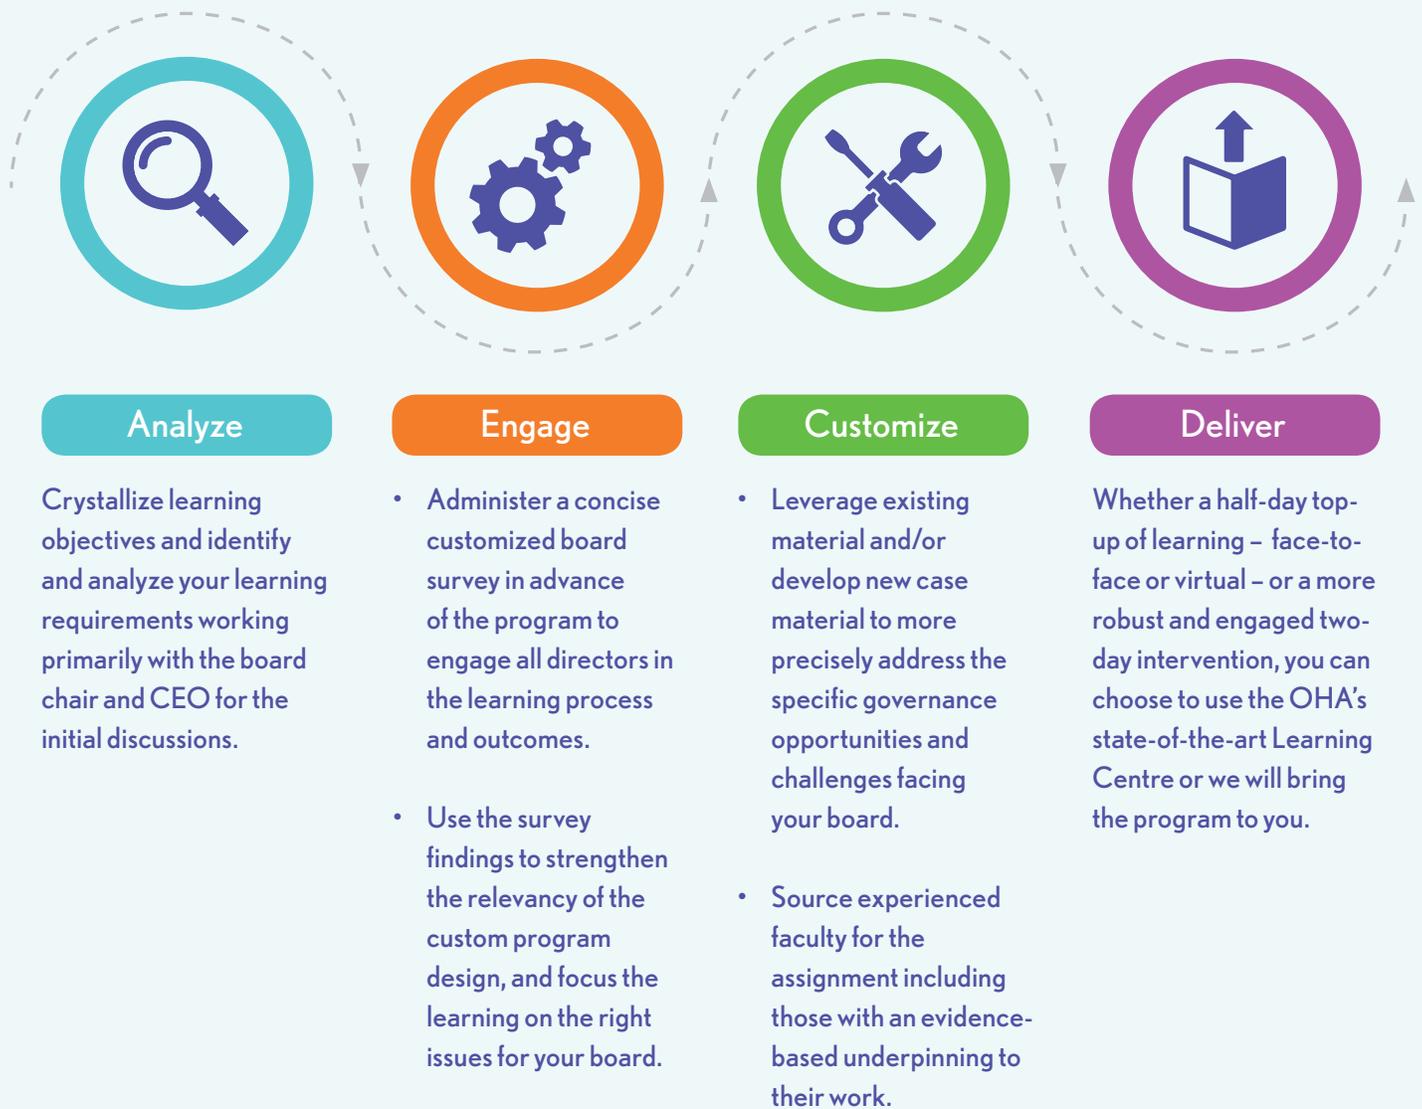

The Ontario Hospital Association (OHA) offers a suite of open enrolment programs through its Governance Center of Excellence (GCE). Increasingly, we are invited to develop customized programming for individual hospital and health care boards as well as for clusters of boards in regional proximity, and clusters of boards accountable for integrated care delivery.

Our learning and engagement team draws upon an extensive network of governance experts in addition to leveraging the OHA's deep and proprietary knowledge of the sector and issues. We are uniquely positioned to serve your governance learning needs in a range of areas such as the integration of care, mergers, director liability, privacy, quality and patient safety, sector risks, board culture, and more.

If you are a board chair or CEO of a hospital or health care organization with an appetite for ongoing governance learning, contact us to set up an exploratory conversation.
